

SMART LITHIUM ION SERIES

SLI-600 - 14 and 28 VDC Dual or Switchable Blocks

The SLI Series Blocks are the most versatile Block Battery designed for cinematic production applications. Utilizing innovative design concepts, the SLI Series provides an advanced feature set including QuickCell modularity and AutoBalance technology, at the same time. The SLI-600 comes in three different models, The SLI-S600-Selectable Voltage Camera Block, The SLI-D600- Dual Voltage Camera Block, and the SLI-HC600- A High Current Selectable Voltage Lighting Block.

Ground Transport ONLY!
with battery packs installed

See reverse side for transportation rules.

SLI-600 Features

- 1 Voltage Selector Switch (SLI-S600 Only):** Selects between **TWO** different output voltage ranges: 12.5v ~ 17.25v or 25v ~35v. Only **ONE** voltage range at a time is available with the **SLI-S600**. For **BOTH** voltage ranges available **at the same time**, please order the **SLI-D600** (No selector switch on "D" model).

SLI-S600 and SLI-HC600- Select EITHER Voltage

Volts	Connector Type
25V~34.5V	3-Pin XLR, Arri Standard (Pin 1 Gnd, Pin 2 Bat +)
12.5V ~ 17.25V	4-Pin XLR, (Pin 1 Gnd, Pin 4 Bat +)

SLI-D600- Dual Voltages at the SAME time

Volts	Connector Type
28V Regulated	3-Pin XLR, Arri Standard (Pin 1 Gnd, Pin 2 Bat +)
12.5V ~ 17.25V	4-Pin XLR, (Pin 1 Gnd, Pin 4 Bat +)

2 ON/Off Enable:

Switch **MUST** be turned **ON** first to enable the output power.

3 ON - Push to Start:

Momentary switch to engage output connectors. LCD will light up when outputs are turned on and battery is **not empty**. If the LCD Display **does not** turn on when the "ON/OFF Enable Switch" is ON and the "Push to Start" switch is depressed, then the battery is **empty**. Start the charging procedure.

4 Output Fuses:

SLI-S600 and SLI-D600:

F2 - 12V~17.25V Fused at 15 amps. Maximum recommended continuous current draw is 12 amps.

F1 - 25V~34.5V Outputs and the 28V regulated outputs are fused at 10 amps. Maximum recommended continuous current draw is 8 amps.

SLI-HC600:

F2 - 12-17.25V Fused at 25 amps.

F1 - 25-34.5V Fused at 20 amps.

- 5 Power Meter:** The Active Discharge screen displays critical output information about the power supplied from the Block Battery. **Note:** Leaving the Block turned **on** while not in use will discharge the Block, it is best to **turn off** the "ON/OFF Enable" switch when not in use. See reverse side for screen descriptions.

6 Charge Input:

Use **ONLY** the **PSU-185** Charger and cable from Block Battery. When the charger is connected the Charge LCD screen will automatically come on. The charge screen displays the amount of time a block has been on charge and the charge voltage.

SLI-600 Specifications

SLI600 Dimensions:

12" (30.5cm) Height x 7.625" (19.3CM) Width x 6.125" (15.5 cm) Depth

SLI600 Weight:

SLI-S600 & SLI-HC600 16 lbs (7.25kg) SLI-D600 17 lbs (7.71 kg)

Temperature Recommendations:

Discharge Temperatures -20°C to 50°C (-4°F to 122°F)

Charge Temperatures 0°C to 50°C (32°F to 122°F)

AmpHours:

17AHrs @ 25V~34.5V or 28V Regulated 34AHrs @ 12.5~17.25V

WattHours: 550WHrs

SLI-600 Storage

Short Term SLI-600 Storage (Up to 1 Week):

- 5°C to 25°C (41°F to 77°F)
- OK to leave on charger
- After depleting an SLI-600 Battery, it is best to get the battery on a charger within a week.

Long Term SLI-600 Storage (More than 1 Week):

- 5°C to 25°C (41°F to 77°F)
- Fully charge battery
- No output devices connected
- Do not leave charger connected
- Recharge every 3 months

Screen Display Descriptions

Sign On Screen: The Sign on screen displays the Software version and the number of recharge cycles on a block each time a block is initialized.

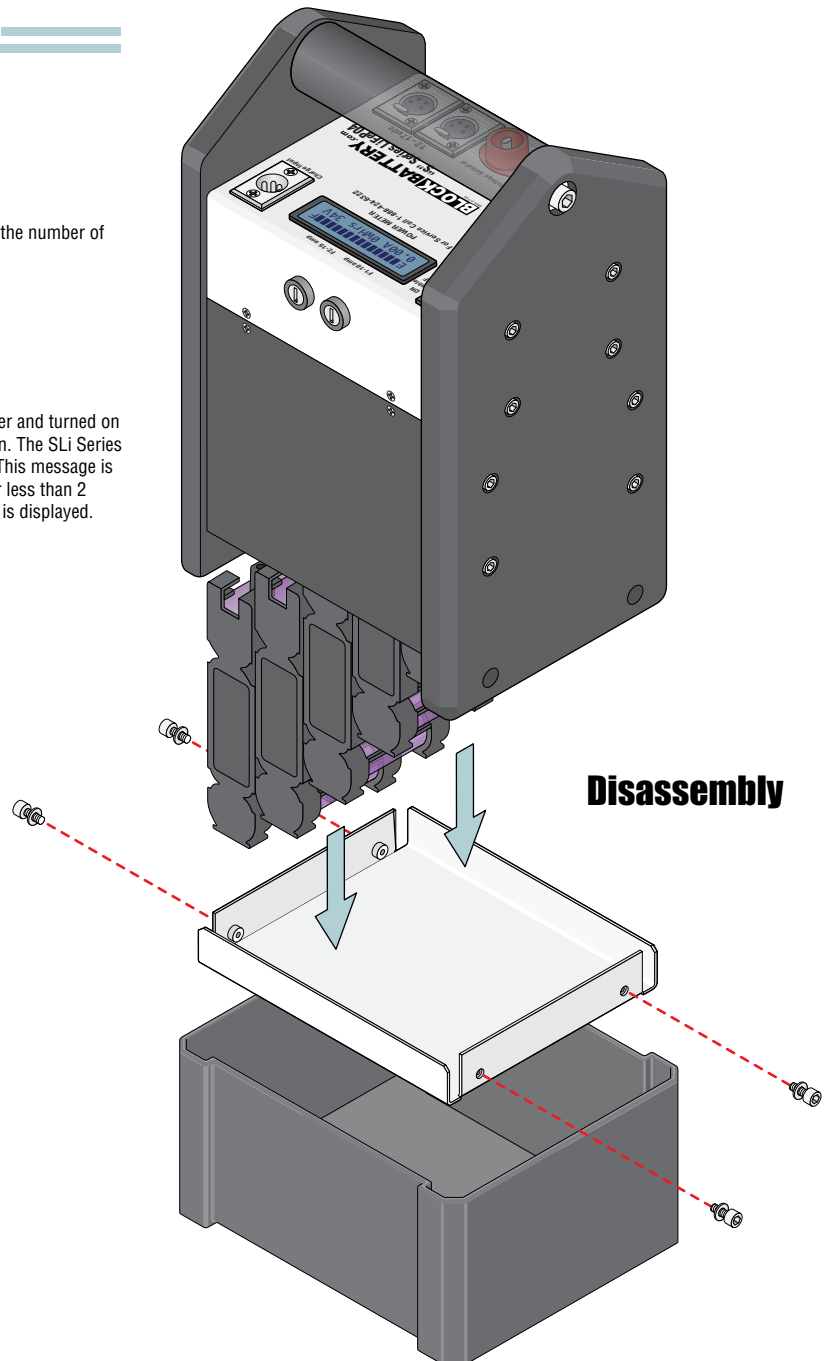

Balancing Output Screen: When a block is removed fresh off a charger and turned on immediately, a balancing output message might appear on the LCD screen. The SLi Series automatically balances the internal cells each time a charge is complete. This message is only displayed if the block is turned on immediately and is typically on for less than 2 minutes. It is best not to connect a block to a camera when this message is displayed.

Discharge Screen:

Charge Screen:

SLi-600 Transportation Guidelines

The SLi Series is a Lithium Ion Block. While we have designed the SLi Series blocks to make it as easy as possible to ship and service the block, we are still restricted to one of **three** types of transportation.

1. A completely assembled SLi-600 is 550WHrs and as such, if you wish to ship a completely assembled block, it must be shipped via an authorized Class 9 Dangerous goods shipper **GROUND SHIPPING ONLY**.
2. The cells in the SLi are easily removed. By removing the rubber boot and removing the four bottom screws, the bottom of the SLi can slide off. The internal cartridges can be simply unplugged for shipping. If you would like to ship the system GROUND without shipping as Class 9 Dangerous Goods. Simply ship all 10- 55 WHr cartridges disconnected and individually wrapped in one box (consult the shipper for proper labeling) and the housing in a separate box.
3. **Air Shipments.** It is possible to ship **2 cartridges per box** and **5 separate boxes** in air shipments. Each cartridge is only 55 WHrs @ 3.2v and will need to be **discharged to 30% state of charge** prior to packing but it is possible in an emergency to transport these cartridges via AIR.
